EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

R. Mark
Claim 1 (Examiner Amended) A method of forming a device including emitters comprising:
exposing one end of a plurality of bundled together fiber segments to a reactive liquid to allow said reactive liquid to react with said ends of said fiber segments to form an array of bundled together tips;
depositing a conductive material on said array of tips;
depositing a dielectric layer on said coated array of tips;
forming a gate electrode on said dielectric layer; and
removing a portion of said dielectric layer to expose at least a portion of coated tips from the array of coated tips.

Examiner's Comments

2. The examiner amendment was inserted to correct for antecedent to correspond to the array of tips in line 5.

Reasons for Allowance

3. Claims 1-22 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-22, wherein emitters are formed by the steps of exposing one end of a plurality of bundled fiber segments into a reactive liquid to form an array to bundled together tips; depositing a conductive material on the array of tips, depositing an dielectric layer on the array of tips, forming a gate electrode on the dielectric layer and removing a portion of the dielectric layer, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following reference are cited for disclosing a fiber array bundled by various methods, but these references do not disclose emitters formed by the steps of exposing one end of a plurality of bundled fiber segments into a reactive liquid to form an array to bundled together tips; depositing a conductive material on the array of tips, depositing an dielectric layer

on the array of tips, forming a gate electrode on the dielectric layer and removing a portion of the dielectric layer, as claimed: Lakeman (3582297), Hudson (3912362), Lloyd (5067792), Rubino, Jr. (6584259 & 20020186940).
